

Housing Density

Hampton Road site: If you do support the proposals, why is that? Is/are there any aspects in particular influencing your view?	Hampton Road site: If you do not support the proposals, why is that? Is/are there any aspects in particular influencing your view?	Hampton Road site: Are there any details of the Council's proposals that you think should be changed? If so, please describe what you would like to see.
The reduction in the number of homes and their lower density,	high density housing out of keeping with the existing community	Housing density
Slightly outside of the density of knowle	density of housing	density reduced to mirror the existing.
Reduction in housing density is to be welcomed.	Unhappy with density.	density far too great
proposals seem to strike a better balance on density	Still concerned about housing density.	Reduce density
Housing density appears appropriate for the area	density of houses completely at odds with character of existing village.	density
Can housing for the elderly reduce the effect of the high density.	density far too great	The nearby housing is of medium density as per KDBH NP survey at about 20 houses per hectare.
The reduction in density is a step in the right direction.	I'm not in favour of very high density - we need to be in-keeping with the local community and other adjacent housing areas.	Reduce the density of housing to similar levels in the remainder of the three villages.
	Volume / density	My major concern is housing density. I think that the existing new developments are ugly and impracticable and an increase in the housing density will only make this worse.
	Too high density.	Lower density of housing
	If low density houses have to be built, they should back on to the houses on Chantry Heath Crescent.	Reduce the proposed density
	Increased traffic density	The density factor is too much,
	Any development must be in keeping with our current average density	a lower density.

Is/are there any aspects in particular influencing your view?	Hampton Road site: Are there any details of the Council's proposals that you think should be changed? If so, please describe what you would like to see.
		Less density
		The density of housing is not appropriate
		Already the traffic density can be very high at peak time
		I would recommend higher density nearer the village thus allowing lower density on the periphery.
		lower density would be much more in keeping with the area
		Housing density should be reduced
		Less density
		Housing density too high
		I don't see why low density housing cannot be built all along the boundary with Chantry Heath Crescent instead of the proposed medium density.
		density
		I am concerned at the proposed housing density.

Arden Triangle Site: If you support the proposals, why is that? Is/are there any aspects in particular influencing your view?	Arden Triangle Site: If you do not support the proposals, why is that? If so, please describe what you would like to see.
Too much density. If school grounds and sports facilities are included in density calculations, very local density becomes even higher	density far too great	Considerably reduce density
Any development must be in keeping with our current average density	density too great.	density too great,
	Again housing density propopsals are in conflict with the APPROVED KDBH NP.	Overall reduction in density
density too high	Reduce the proposed density of housing to similar levels in the remainder of the three villages.	density of houses
I would ask that the density is reduced.	High density build	density of housing
Proposed density still seems high.	density of housing inappropriate.	less density of housing
	density,	Lower density
	High density housing. Not in keeping with surrounding buildings.	Reduced housing density
	The density and social housing mix is not appropriate for the local area. Middlefield has a poor reputation with many problems for residents.	Reduce the amount of high density housing
	density - Middlefield is an appalling development with crowding and no greening.	Lower housing density
	The housing density is too great	housing density should be lowered
	Too much high density housing	The housing density
	Too much high density housing not in line with the local plan.	too high density
	The high density housing will be a disaster	The density and housing mix must change.

Arden Triangle Site: If you support the proposals, why is that? Is/are there any aspects in particular influencing your view?	Arden Triangle Site: If you do not support the proposals, why is that? If so, please describe what you would like to see.
	density	The density and hosing mix must change.
	Housing density of this magnitude relative to the existing size of Knowle will destroy the character of the place	density
	housing density too high	Housing density is shocking. Middlefield looks like an encampment
	density is too high for healthy family life	My major concern is housing density. I think that the existing new developments are ugly and impracticable and an increase in the housing density will only make this worse.
	Too many high density housing	a lower density
	I have big concerns about housing density	lower density
	The housing density is too high and not in keeping with the village.	Housing density should be lower
	I have a concern over density of housing	density of housing
	The housing density is too great for the area.	The density of the housing.
	housing density	Reduce the density of any housing that does go ahead.
	High density will degrade the areas desirability	Concerned over proposed high density adjacent to Station Road.
	too high density.	Lower density
	Housing density FAR too high	It should be much lower density
	density of housing	Less density.
	A density of 40dph too high and will adversely impact on the nature of the village	I am worried about the density of housing suggested.

Arden Triangle Site: If you support the proposals, why is that? Is/are there any aspects in particular influencing your view?	Arden Triangle Site: If you do not support the proposals, why is that? If so, please describe what you would like to see.
	A density of 40dph is too high and will adversely impact on the nature of the village	density of housing needs to be decreased.
	greater clarity on density	density of housing,
		Higher density housing on site of current school may be sensible (near the village and public transport), but not higher density than we currently have in the area.
		reduced density
		Reduce density of housing
		Less density,
		density,
		Reduction in housing density.
		The housing density is far too great
		Less density
		housing density
