

# Want to know what 1,500 new houses means for KDBH Transport Infrastructure and Landscape?

Of course - we all do. **Except**, it would appear, Solihull Council who will NOT be undertaking any such impact analysis for their Local Plan proposals to build 1050+ new homes on two large Green Belt sites in Knowle (on top of which will be new “windfall” housing).

We won't even get any detailed assessment of the proposed sites until **AFTER** the Local Plan has been approved.

## When it's too late to challenge the proposals

A two minute video explains more at [www.kdbh-np.org/donations](http://www.kdbh-np.org/donations)

Whatever your views on the proposals, surely it's **vital** that we understand, and plan for, the impact of such major change on our villages' infrastructure and environment?

**DID YOU KNOW THAT**

Solihull Council Plans to Build

**1,050**

New Houses in Knowle?

Parking and traffic flow are already major concerns in KDBH - as you made abundantly clear in both the business and residents' surveys - with landscape and green space a top priority.

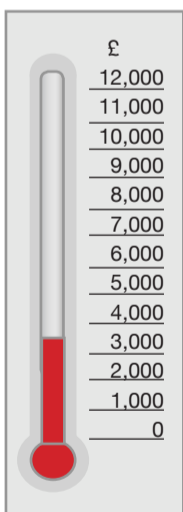

## Join the Campaign

With the approval of Forum Members, we've launched a Campaign to raise between **£10,000** and **£12,000** to commission two 'official' impact assessments covering Transport and Landscape. More details on the Campaign, and what the studies cover, on our website as above.

Local people have already contributed over **£3,000** in six weeks since launch

PLEASE HELP US RAISE another **£2,000**, which we urgently need in the next 2-3 weeks to get the Transport study fully commissioned in time for findings to be available to feed into Solihull Council's formal consultations on the updated Local Plan at the end of this year.

We are a community of over 19,000 people. Small amounts from lots of people **really can** make a difference. You can donate today, through our website or in other ways as described below:
